Methodology for CA-530 - Alpine, Inyo, Mono Counties CoC

Sheltered Population Total

1. What data source(s) was used to produce the total number of people included in the sheltered population (staying in an emergency shelter, Safe Haven, or transitional housing) on the night of the count? Please indicate the percentage of the PIT count derived from each of the sources. (If a source was not used, please enter zero).

HMIS Data	**20%**
Provider-level surveys	**40%**
Client-level surveys	**40%**
Observation	**0%**
Other	**0%**
Total	**100%**

2. Was the CoC able to collect information about the number of people being sheltered on the night of the count from all emergency shelters, Safe Havens, and transitional housing projects listed on the HIC or only some? listed on your HIC or only some?

- Complete census count

3. What information or method(s) was used to de-duplicate the count of the total number of people included in the sheltered population?

- Comparison of personally identifying information (PII), such as name, date of birth, and Social Security Number

Sheltered Subpopulation

4. What data source(s) was used to produce the demographic and subpopulation data included in the sheltered population (staying in an emergency shelter, Safe Haven, or transitional housing) on the night of the count? (select all that were used)

- HMIS Data

- Provider-level surveys

- Client-level surveys

5. Was the CoC able to collect information about the demographic and subpopulation characteristics of all sheltered people or only some?

- All sheltered people

6. Looking at the change in your sheltered count from last year's count, please choose up to three reasons that best explains these changes from the drop down list below.

- Change in emergency shelter capacity

Please provide a brief description of these specific factors (500 word limit):

There was a 22 percent decrease in the number of sheltered people experiencing homelessness between the night-of-the-count in 2021 (58) and 2022 (45). The reduction is attributable to the response by service providers to the COVID-19 pandemic and limited emergency shelter capacity. Before the number of coronavirus cases began to increase in January of 2022, the Counties, CoC Administrative Entity, and other service providers were issuing fewer hotel motel vouchers for people experiencing or at imminent risk of homelessness and testing positive for or exposed to COVID-19. The Administrative Entity also experienced a fiscal crisis at this time which resulted in a significant decrease in the number of hotel/motel vouchers issued for the night-of-the-count in 2022.

Unsheltered Population

7. What approach(es) was used to count the total number of people included in the unsheltered population during the PIT count. (select all that were used)

- "Night of the count" - known locations

- "Night of the count" - random sample

- HMIS

7a. Were certain areas within the CoC geography specifically excluded because the CoC had reason to believe there were no unsheltered people in those areas?

Yes

7b. How did the CoC select the areas that were included for canvassing?

- Areas were not selected randomly, but an effort was made to use local knowledge to target known locations (e.g., areas with known concentrations of unsheltered homeless people)

7b1. Did the CoC adjust the information in some way (e.g., statistical adjustment or extrapolation) to account for areas within the CoC geography that were not canvassed but where unsheltered people might have been on the night of the PIT count?

Yes

7c. In areas that were canvassed, did the CoC count all unsheltered people in those areas or a sample of people?

- All people encountered during the count

8. What information or method(s) was used to de-duplicate the total count of people in the unsheltered population? (Check all that apply)

- Comparison of personally identifying information (PII), such as name, date of birth, and Social Security Number

Unsheltered Subpopulations

9. What approach(es) was used to collect demographic and subpopulation data about unsheltered people included in the unsheltered population during the PIT count?

- Surveys/interviews of people identified as unsheltered on the night of the PIT count

- Surveys/interviews of people identified within 7 days following the night of the PIT count night who may have been unsheltered on the night of the PIT count (e.g., "service-based" surveys at locations where people who are homeless go for assistance)

10. Were all people who were encountered during canvassing on the night of the count or during post night of the count PIT activities asked to complete a survey/interview?

- All people encountered were surveyed

11. What information or method(s) was used to produce an unduplicated total count of homeless people across your sheltered and unsheltered populations?

- Comparison of personally identifying information (PII), such as name, date of birth, and Social Security Number

12. Looking at the change in your unsheltered count from last year's count, please choose up to three reasons that best explains these changes from the drop down list below

- Change in rapid re-housing capacity

- Impact of coordinated entry

- Weather

Please provide a brief description of these specific factors (500 word limit):

Alpine, Inyo, Mono Counties CoC experienced a 41 percent decrease in the number of unsheltered people experiencing homelessness (PEH) between the night-of-the-count in 2020 (162) (last unsheltered count) and 2022 (95). The reasons for this reduction are the reduced capacity of service providers responding to the COVID-19 pandemic and a 105 percent increase in the number of sheltered PEH between 2020 (22) and 2022 (45). In addition, service providers believe that the weather was also a factor in the unsheltered count this year. It was extremely cold throughout the region on the night-of-the-count and PEH sought shelter on their own and stayed with friends and relatives or in a hotel.

Point-in-Time Notes for CA-530 - Alpine, Inyo, Mono Counties CoC

Date of PIT Count: 2/23/2022
Population: Sheltered and Unsheltered Count

Notes

There was a significant increase in COVID-19 cases during January in Inyo, Mono, and Alpine Counties. The CoC requested a waiver, which was approved by HUD, to conduct the Count during the last ten days in February 2022.

This to confirm that there were five times more unsheltered persons in households without children (76) than sheltered persons in households without children (11) on the night of February 23, 2022, in Inyo, Mono, and Alpine Counties. The reported figures are consistent with previous counts in the CoC service area and attributable to the unavailability of emergency shelter, transitional housing, supportive housing, and other shelter options.

All Homeless Populations: Households with at least one Adult & one Child

There was a significant increase in COVID-19 cases during January in Inyo, Mono, and Alpine Counties. The CoC requested a waiver, which was approved by HUD, to conduct the Count during the last ten days in February 2022.

This to confirm that there were five times more unsheltered persons in households without children (76) than sheltered persons in households without children (11) on the night of February 23, 2022, in Inyo, Mono, and Alpine Counties. The reported figures are consistent with previous counts in the CoC service area and attributable to the unavailability of emergency shelter, transitional housing, supportive housing, and other shelter options.

All Homeless Populations: Households with only Children

There was a significant increase in COVID-19 cases during January in Inyo, Mono, and Alpine Counties. The CoC requested a waiver, which was approved by HUD, to conduct the Count during the last ten days in February 2022.
